

PROPSPEED QUAD CHART

ENSURE OPERATIONAL READINESS WHILE REDUCING COSTS AND SAVING FUEL WITH PROPSPEED®.

Propspeed is the original foul-release coating. Recognised globally as the best solution to prevent marine growth and aid in protection from corrosion and electrolysis on running gear and all underwater metals. Our super slick coating system saves you time and money through increased efficiency and easy maintenance.

VALUE PROPOSITIONS

- **ALL-IN-ONE PROTECTION** - Defence against marine growth, corrosion and electrolysis.
- **BIOCIDE FREE** - Foul-release, not antifoul.
- **REDUCE RUNNING COSTS, EMISSIONS, AND SAVE FUEL** - Vessels are more efficient to run, due to prevention of marine growth and the coating surface having less friction when moving through the water.
- **OPERATIONAL READINESS** - Underwater metals are kept free from marine growth, ensuring that vessels can run at peak efficiency throughout its entire service cycle.
- **REDUCED ANODE FALL OUT** - Propspeed provides a dielectric barrier between metal substrates and the external marine environment.
- **SUPERIOR ADHESION TO METAL** - Long-lasting adhesion to metals.
- **TRANSFER OF INVASIVE SPECIES** - Invasive marine species and biofouling are having negative effects on marine ecosystems.

DISCRIMINATORS

- Proven product in the field.
- Tested rigorously by other manufacturers to obtain endorsement.
- Currently on the NZ Navy vessels 'Te Kaha' and 'Canterbury'.
- Superior in-field technical support and training available in multiple regions.
- Commercial kit in the market to meet commercial applications.
- Variety of applications for all types of defence craft.

A COMMERCIAL KIT, FOR COMMERCIAL OPERATORS

The Propspeed Commercial Kit has been created specifically for the commercial marine professional. Propspeed is a two-part coating system that features an exceptionally strong chemical and mechanical bond between the metal substrate, the Etching Primer, and the Clear Coat. The Etching Primer is known for its iconic gold colour, tenacious adhesion to metal substrates and superior corrosion resistance. The Clear Coat provides a super slick surface that marine growth cannot adhere to. Combined, they form a system that is **unrivalled in performance, supporting operational readiness and ensuring that your vessel can run at its peak** throughout the seasons.

IN THE KIT

Product code: PSCKIT-EU

- 1x 500ml Propprep
- 2x 960ml Etching Primer Base
- 2x 240ml Etching Primer Hardener
- 1x 1280ml Clear Coat
- 2x stirring sticks

Surface Coverage:
1x Kit = 14.2m² / 153ft²

www.propspeed.com/commercial

The Propspeed system is suitable for use on propellers, shafts, rudders, struts, keel coolers, pod drives, thrusters, fire suppression pumps and any other underwater metal surface.

PROVEN PERFORMANCE WORLDWIDE

“The benefits of Propspeed are definitely noticeable in terms of a much cleaner propeller when we haul the vessel for survey, maintenance and repairs. Application of Propspeed has now become a must-do job at all haul outs.”

- Andrew Stark, CEO, Ocean Fisheries

“Before using Propspeed, we had as much as 4 inches (10cm) of growth on the propeller shaft. With Propspeed applied, our running gear is now free of growth.”

- Captain Rick Gauron, Yankee Freedom III
